

Welcome to the Institute of Sustainable Process Technology

An introduction

Our belief

We believe that **radical change** can be achieved through technological innovation and **cooperation**.

As an active and open innovation platform for sustainable process technology **we connect** stakeholders from different sectors and disciplines.

At ISPT, Industry, SME's, scientists and governmental bodies find the **inspirational** and **trusted** environment where they can optimally work together to stimulate **break through innovations**.

Together we realize a circular and carbon neutral industry in 2050.

What's in it for me?

- Partners appreciate ISPT because of:
- The **active, inspiring and trusted community** regarding Process technology.
- The bringing together of companies and knowledge institutes for **research and development**.
- The identification of **new and relevant trends** regarding Process technology.
- The effective and broad **dissemination of knowledge**
- The ability to **initiate and manage big complex long term programs** as an independent party (from fundamental through breakthrough to demonstration).
- The **appreciated and accepted way of working** (by our partners) so that projects can quickly start and costs and risks are shared.
- The bringing together of industries and knowledge institutes to **stimulate and develop the process technology education**
- The Identification of **financial possibilities** and optimally utilizing these options to support the set goals.

The way we work: clusters

A cluster is an execution form for a set of innovation activities carried out in an open consortium, with an open end, where activities are initiated and ended in consultation with all participants, and where all results are shared. Partners jointly work on realizing roadmap projects. Participation in such a roadmap project is based on a fee that represents the needs and competences of the cluster partners.

Joining ISPT

**Means access to knowledge, people
and education which supports you to
be great at what you do.**
